Manuel Echeverria, affiliated with United Farm Workers of America, spoke here Tuesday night. A political science major here, Echeverria urged a peaceful demonstration during next month's scheduled appearance by Teamster president Frank Fitzsimmons.

A vet's checklist

To avoid unnecessary hang-ups and hassles, and to insure good service to those veterans on campus who are receiving G.I. benefits, the veteran representatives for Cal Poly recommend:

—When contacting the campus representative have your V.A. file number (C No.).

If you have any problems be sure and contact the veteran representative on campus. They are located across from the El Corral Bookstore in University Union Rm. 103.

To inform all of AB 3116

Plotkin summons students

by CLAUDIA BUCK

In a rare move in student body history here, ASI Pres. Scott Plotkin has called for a special meeting of the entire student body next Tuesday, Feb. 4.

The meeting, which will be held in Chumash Auditorium at 11 a.m., has been set to discuss what Plotkin terms "one of the most crucial issues facing student governments," AB 3116 and the accompanying referendum on maintaining student body fees.

Survey: Poly students like houses better

The preliminary results of the Housing Preference Survey—sent out to 800 randomly picked Poly students and faculty—seem to show that students would prefer a house, in a mixed age-group residential area rather than on- or off-campus student housing.

Reasons most often given by those polled for selecting their current housing were, with largest response first; nothing else available at the time, type of housing, cost and distance from campus, other, condition and design, number of roommates, and last, availability of recreational facilities.

The preliminary survey results show the majority of students live within five miles of the campus.

(continued on page 3)

Plotkin said it is vital that he talk to as many groups as possible to inform them of AB 3116 and its impact. Plotkin encourages any interested student to attend. Also a representative from every organized group on campus is required to attend.

During the special session, Plotkin will outline background behind the bill; how and why it will be implemented; and answer any questions. Also, the student body fee referendum, where students will decide whether or not to maintain the current \$20 level, will be clarified.

The referendum, included by state legislators as a mandatory requirement for the entire 19-campus system in passing the bill, will be voted on during campus elections Feb. 23 and 26.

However, the student vote is an advisory referendum and does not set the final fee. The final decision rests with the Chancellor's office, following the recommendation of Pres. Robert Kennedy.

According to the director of ASI business affairs, Roy Gersten, if the student referendum sets the fee too low to cover certain commitments (such as the football team's schedule into 1982), Kennedy will be forced to recommend raising it.

Endorsing a yes vote on the referendum, the Poly branch of the statewide Campus Referendum Advisory Board (CRAB) officially launched its campaign at a recent Student Affairs Council meeting.

Although admittedly biased towards a yes vote to maintain

the fee at its present level, Executive Committee spokesman Sue Stevenson said "this is a state-mandated election and we're simply giving our side to the issue."

Committee member John Ronca explained the master calendar outlining campaign strategy, passed out the buttons which will be sold on a donation basis as a publicity fund raiser and had SAC members sign up to address various clubs on campus.

Next Thursday, Feb. 6, the committee will be holding training sessions to brief a speakers pool composed of debate team and Speakeasy Club members. The speakers will be addressing various classes and organizations regarding the bill.

AB 3116, which became effective Jan. 1, appropriates \$2.6 million for Instructionally Related Activities (IRA) throughout the state system. These are activities and laboratory classes which are at least partially sponsored by an academic discipline or department and which are integrally related to formal instruction. In the case of Poly, these programs include agricultural judging, forensics, intercollegiate athletics, publications, a portion of Poly Royal, drama, the art galleries, and Model United Nations among others.

Poly already has received two-thirds of its \$161,984 allotment or \$107,989 for the two quarters since the fiscal year began July 1, 1974. (Since the first half of the fiscal year already has passed,

Food club cooking it on nutrition

by DENISE COLSTON

Food Industries is in the school of Agriculture and Natural Resources — not a concentration of Home Economics.

"We follow the product from harvest to market," said Heidi Burri, Cal Poly Food Industries Club member. The food industry student applies knowledge of managing jobs connected with operations of the industry from field to market. The graduate is qualified in production, quality control, food technology, marketing and management of the product, Miss Burri said.

The Food Industries Club is concerned with the public's awareness to preservation and processing of food. The goal of food preservation is to free man from total dependence on geography and climate in providing nutritional needs and wants.

As food preservation works toward this goal it trades off with inevitable loss of nutrients. The process of improving flavor, texture and appearance of food leads to better retention of nutrients.

According to October 1974 Food Technology, normal home cooking results in high loss of nutrients. Major vitamin loss occurs during final preparation of food. Water-soluble vitamins are lost by percolating the liquid. And other losses as in fat-soluble vitamins occur during heating and storing in the presence of air.

Protein and vitamins can be destroyed when heated to high temperatures or lost at a slower rate when stored at room temperature, Food Technology said. Mineral losses in food material result from dissolving in cooking water.

Overall, food preservation techniques as blanching, (inactivating biological systems which degrade vegetables and fruits) heat processing, drying, freezing, and fermentation do not cause major losses in the nutritive value of food — they may even enhance their acceptability.

Processing of jam can be viewed on campus Feb. 5, 8 a.m.-noon. Beginning with the whole fruit, the Food Industries Club will demonstrate the steps to make jam.

Club and student projects are sold at the Food Processing store located on Campus Way. After purchasing the raw materials needed for production in the laboratory, students are reimbursed through the final sale of their product.

photo by JO VESCO

Kurt Williams, right, is helped by Food Industries Club members Barbara Means and Marguerite Sigrist.

Column called 'low blow'

Editor:

I enjoy reading the Mustang Daily, and my favorite item in there are the editorials. Until this morning, they attempted to present both sides of the story, regardless of your own personal view and those of the other writers.

Then along comes Allison Harvey's tirade against advertising, stockbrokers, and capitalism. I give little merit to the editorial for two main reasons.

The first is that I find it very hard to believe that a journalism major with a concentration in editorialization is so idealistic that she would condemn the very lifeblood of the industry she hopes to become employed in.

The second reason that I do not appreciate the finer points of her technical editorial skill, is that the writer used quite a few empty phrases and made statements that, aside from not having anything to do with the editorial

(who cares if Russians haven't had their orange juice this morning—they are able to get Pepsi Cola now so the sunshine fruit's healthful juices are probably only a quarter page ad in Pravda anyway) and that they wouldn't stand up if they did.

Stockbrokers are not totally responsible for the current financial fiasco. Maybe they sell stock, but people have to buy it before a stockbroker can make his money on the deal.

Letters

It is the same with advertising. Our wants and needs are insatiable!!! Any first year business student can tell you that. We may not need something, but if we see an advertisement, we might buy the product, and if we use the product enough it will

become one of our needs. We don't need buildings, books or clothing, if you want to get very basic about the whole thing, but they make it a lot easier to live.

Advertising serves as an information medium almost as much as does a newspaper. While the paper tells of what has passed, the good ad (and this does not mean that all advertising is good) tells you of the future.

Finally, and this was the lowest blow in the whole editorial, Ms. Harvey stepped across the bounds of decency and good taste by criticizing the fact that Cal Poly has a department that turns out people to work in public relations.

What right has she to dictate what courses students should be able to take? A periodical of any sort without a PR section would function about as well as it would if it had no editorial control. In short, another MAD magazine.

I sincerely hope something good will come of this.

Dan Fredman

Vet benefit law changes are urged

Editor:

Significant changes are needed in veterans' benefits laws and in the Veterans Administration, in regard to services for Vietnam-era veterans. I am a veteran who wants to see these changes made, and I would like to locate other veterans who can contribute good ideas or useful energy in these directions.

For example, certain changes in the laws could free thousands of veterans to pursue alternative learning experiences of all kinds, not necessarily related to working towards a degree. This could include such things as carrying out a self-designed learning project, pursuing an apprenticeship in crafts, or starting an experimental living-learning community. These are only examples of the wide number of possibilities not yet explored, and currently denied to veterans.

Other areas are equally important. I'm particularly interested in setting up a nationwide skills-ideas-friendship exchange network among veterans. Such a network could lead to many good experiences, as well as to ways to get changes accomplished.

If you are interested in these things, and are a veteran, I'd like to hear from you - Lawrence Morgan, P.O. Box 865, Lawrence, KA. 66044.

'Definition of life' refuted by reader

Editor:

This letter is directed to the article "Definition Of Life Questioned", published in the Mustang Daily, Jan. 24, 1973.

To put this bluntly, Donald J. Curtis, Chairman for Life, you are a liar. You deceive the people by claiming that "abortion is allowed on demand." The hell it is!!

The Supreme Court decision of Jan. 22, 1973 states that an abortion may be obtained during the first three months of pregnancy. In fact, the Supreme Court states the woman has the absolute right during the first three months of pregnancy to decide whether she wants to bear the fetus. Between the third and seventh months of pregnancy, the states have the power to regulate medical aspects of abortion. After the 26th or 27th week (or 6 months) states may forbid all abortions except those essential to save the mother's life or health.

Therefore: ABORTION IS NOT ALLOWED ON DEMAND

Plotkin summons students

(continued from page 1)

each campus received either one-half or two-thirds of the annual appropriation depending on whether it was on a quarter or semester system.)

According to the state legislature, the state funding of IRA is to provide support to overcome problems of program discontinuity which student bodies face due to the declining value of the dollar and the numerous programs competing for use of limited funds.

However, said Gersten, Poly will spend \$35,437 more than it will receive from the state for Winter and Spring Quarters.

"If students want any more than a minimum of basic programs as determined by the state, additional ASI funds will be imperative," he said.

According to Ronca, since the state is only providing a portion of the funds necessary to support these programs, students likely may find many of these "will have to be eliminated if the matching portion the ASI provides is reduced through the student body fee."

Further, he added, if the fee is reduced, the quality of numerous programs the ASI provides will be jeopardized. Among those possibly threatened are Outings, Films Committee, the Craft Center, Speakers Forum, Legal Aid and Concerts Committee.

"If they think concerts are bad now," Ronca said, "wait and see what happens if the fee is reduced to \$10 and the budget is cut in half."

The \$20 ASI fee has remained unchanged since 1951. However, said Gersten, inflation has reduced the purchasing value of the dollar to approximately 52 cents. "Although the size of the student body has increased each year, such increases have not been sufficient to offset the results of inflation." Inflation has also reduced the unallocated reserves of the ASI to their lowest level in six years. These reserves are used to bail out groups who suffer financial losses.

In the past, when there are insufficient funds from reserves to offset deficits, budget groups receive cuts in their expenditures. Many groups have resorted to raising admission prices to conquer the problem, Gersten said.

After this year, the state funding of IRA will become a line item on the governor's budget and subject to legislative vote

each year. Consequently, the governor can choose at any time to veto the expenditure, "leaving Poly with no state funds and (if it happens) reduced ASI funds," said Ronca. "If Poly wants to continue with things like movies, speakers and intramurals as well as expand with new programs," he added, "it's crucial they stop and think before voting to reduce the fee."

Famed author to be here in February

Famed poultry author and management consultant Mack O. North will be the guest speaker at the 43rd Annual Turkey Banquet this Saturday night. The banquet, sponsored by the Cal Poly Poultry Club, will begin at 6:30 p.m. at Vista Grande.

Preceding the banquet will be a coffee hour at 1 p.m. at the Cal Poly Poultry Unit and a student seminar, also at the Poultry Unit.

House survey

(continued from page 1)

Walking and driving were rated as the most popular means of transportation. Bicycles and then public transportation were listed next in preference.

Both married and single students were surveyed with the results of the two being tabulated separately. The survey shows the average cost of housing for married students to be \$155 a month while single students pay an average \$75 per month and have 1.9 roommates.

The preferred amount of rent for the students surveyed closely matched the average currently paid by the students in both the married and single categories. Many students, however, do not live under the average conditions depicted in the survey and with the completion of the survey analysis a better view of the variety of circumstances in

which Poly students and faculty are now living should emerge.

Of the 800 surveys sent out 500 were returned completed. Terry Sanville, Planning Associate for the City Department of Planning and Building, termed the response to the survey as good.

Sanville pointed out that the returns received closely follow the percentages of married, single, and faculty currently at Poly as well as coming within one or two percentage points on class ranking and sex variables.

The survey is the product of a joint effort between Cal Poly and the San Luis Obispo Department of Planning. The survey results, according to Sanville, will serve as an input for the forthcoming general plan revision to be done by the city.

Although student and faculty desires will be considered there are many other factors that Sanville says "must fit together in order to create a realistic general plan."

It Sounds Incredible

BUT EVELYN WOOD GRADUATES CAN READ

THE EXORCIST IN 58 MINUTES

At That Speed, The 403 Pages Came Across
With More Impact Than The Movie.

You can do it, too. So far over 550,000 other people have done it. People who have different jobs, different IQs, different interests, different educations have completed the course. Our graduates are people from all walks of life. These people have all taken a course developed by Evelyn Wood, a prominent educator. Practically all of them at least tripled their reading speed with equal or better comprehension. Most have increased it even more.

Think for a moment what that means. All of them—even the slowest—now read an average novel in less than two hours. They read an entire issue of Time or Newsweek in 35 minutes. They don't skip or skim. They read every word. They use no machines. Instead, they let the material they're reading determine how fast they read. And mark this well: they actually understand more, remember more, and enjoy more than when they read slowly. That's right! They understand more. They remember more. They enjoy more. You can do the same

thing—the place to learn more about it is at a free speed reading lesson.

This is the same course President Kennedy had his Joint Chiefs of Staff take. The staff of President Nixon completed this course in June 1970. The same one Senators and Congressmen have taken.

Come to a Mini-Lesson and find out. It is free to you and you will leave with a better understanding of why it works. One thing that might bother you about your reading speed is that someone might find out how slow it is. The instructors at the Evelyn Wood Reading Dynamics Free Speed Reading lesson will let you keep your secret. It's true we practice the first step to improved reading at a Mini-Lesson and we will increase your reading speed on the spot, but the results will remain your secret. Plan to attend a free Mini-Lesson and learn that it is possible to read 3-4-5 times faster, with comparable comprehension.

SCHEDULE OF FREE MINI-LESSONS

You'll increase your reading speed

50 to 100% on the spot!

EVELYN WOOD READING DYNAMICS

The Big Shot

"If I had one spacecraft, one Space Age development to save the world, I would pick ERTS and the satellites which I believe will be evolved from it later in this decade."

NASA Administrator Dr. James C. Fletcher had this to say of the Earth Resources Technology Satellite sent into orbit last week. The satellite, dubbed Landsat, is the second in a series of global monitoring satellites capable of photographing any given spot on earth every eighteen days. The data returned to earth from Landsat will be used in federal, state, and foreign governments, international organizations, universities and private companies for a broad range of earth studies.

The satellite was the first of six to be launched this year from the Kennedy Space Center at Vandenberg Air Force Base near Lompoc. Eighteen more will be sent into space from Florida.

Most of the missions scheduled in NASA's earlier years were undertaken to explore the space environment and develop techniques required for manned and unmanned exploration.

In contrast, approximately one-half of the missions scheduled for 1975 involve applications satellites to survey the earth and its resources, improve communications and enhance the accuracy of weather forecasts.

These are launched for other governmental agencies, foreign governments or private industry, with the space agency being reimbursed for launch vehicles and associated launch costs.

In its 29 months in orbit, ERTS-1, (Landsat predecessor), has returned more than 100,000 images, covering the entire U.S. and many other parts of the globe. The program benefits many scientific and technical areas. Agriculture, forestry, land use and mapping, water quality and resources, minerals and land resources, marine resources, and the environment, are among them.

Landsat picks up the variations in sunlight patterns reflected from objects on earth (even variations caused by subterranean materials, such as mineral deposits and water). This information is transmitted to earth, where it is translated into photo prints and tapes, and distributed to researchers, analysts and users in agriculture, geology, land use planning and many other fields.

Prof unbottles genie today

"Contemporary Poetry: Unbottling the Genie," will be the topic when Dr. Gordon Curzon speaks here today.

Dr. Curzon's talk, which is being presented by the School of Communicative Arts and Humanities, will be given at 11 a.m. in Rm. 220 of the

University Union. Admission will be free.

A member of the English Department faculty here since 1970, Dr. Curzon will discuss the new strain of poetry that has emerged from a disharmonic contemporary society.

Before joining the faculty, Dr. Curzon taught at College of the

Desert in Palm Desert. He earned his doctor's degree at the University of California at Riverside, where he was a teaching assistant. He is editor of the California State Poetry Quarterly.

The talk on "Contemporary Poetry: Unbottling the Genie" will be the seventh of 12 programs scheduled as part of the Arts and Humanities 1974-75 series. Now in its fourth year, the series has offered a broad range of programs including programs of choral music, painting demonstrations, and lectures on various subjects.

\$1,000 grant

A \$1,000 research-travel grant from the Reader's Digest Foundation has been awarded to the Cal Poly Journalism Department.

The grant is used for travel to collect in-depth story material and photographs and to defray research costs for other important news events. This is the eighth year the department has received such a grant.

Your prof just assigned the \$24.95 textbook he wrote.

Photo winners announced

The winners of the "This Is Cal Poly" Photography Contest were announced at an informal ceremony on Wednesday, Jan. 29 at 10 a.m. at the El Corral Bookstore.

Ken Chen, a fourth year architecture student, won a \$50 El Corral Gift Certificate first prize for his entry entitled "Gone."

Mark MacKinnon, a second year business major, was awarded the second prize, a \$20 El Corral Gift Certificate, for his photography called "Reflections."

Third prize, a \$10 El Corral Gift Certificate, went to Max Boveri, a senior majoring in journalism, for his entry entitled "John Stewart."

Boveri also won Honorable Mention for an untitled photograph.

Entries were judged on the basis of subject choice, composition, communication, print quality, and finish by Mrs. Helen Kelly, Bob Howell and Allen Pierce, all photo-journalism instructors.

Of the photographs, which will be on display in the El Corral Bookstore until March, Mrs. Kelly said, "We felt that the entries did give a well balanced view of Cal Poly and the life of students."

Mustangs kick Bruins around

Losing only two matches, the Cal Poly wrestling team swept to a 28-6 win over the UCLA Bruins Tuesday night. The Mustangs won six straight bouts en route to their tenth dual meet win.

Winning his 17th bout of the season, Rodger Warner gave the best show of the evening as he defeated Bruin Mark Black, in a superior decision, 16-3. With a footwork performance that Muhammad Ali would be proud of, Warner danced his way through the match showing complete control from the outset.

Mustang Mike Bodine surprised the crowd by pinning UCLA's heavyweight, Pete Pele in the third period. After the match Poly Coach Vaughan Hitchcock said from the beginning the plan was to tire out the

UCLA freshman and then have Bodine take control.

Moments after the pin Bodine still looked shocked as he said "I didn't have that planned?"

Mark DiGirolamo won his 15th bout of the season as he won a 4-1 decision over Bruin Jim Mendoza at 118 pounds. Cal Poly's Don Lawson won a tight match as he edged UCLA's Steve Pilcher, 3-2. It was the first win for the freshman after replacing the injured Benje Williams at 126 pounds.

The Mustangs, now 10-6, have the roughest part of the season out of the way. The team now has to concentrate on keeping itself together and not making mistakes, said Hitchcock.

Their next match will be here against UC, Berkeley Friday night at 8 p.m.

photo by JOHN GORDON

Race horse owner defended

BENTON, LA. (UPI) — Racehorse owner Rex Ellsworth does care about his horses, says his son. It's just that the ranch, which produced the winner of the Kentucky Derby two decades ago, has fallen on hard times. About 100 horses were found starving on the Ellsworth ranch in California last week. Kim Ellsworth said his father will do everything he can to take care of them, even if it means selling some of them.

Ellsworth, whose California-bred Swaps won the Kentucky Derby in 1955, was accused by animal welfare authorities of allowing some of the horses to die of starvation and the rest to approach death because of lack of food.

The son has 50 to 60 thoroughbreds on a spread near this Northwest Louisiana town and said some of them were brought from the California ranch a year ago. He said the California horses were being taken to another ranch near Tucson, Ariz., on a daily basis before news of their condition was made public.

"It's depressing for us," the younger Ellsworth said. "No one likes to see these things happen and especially get it blown sky high when with just a little luck we could have gotten the horses taken care of."

"Problems do exist, but I do think any farm in America will have some thin mares at this time of year that don't look good. Problems down there in California are a little worse, but not quite as bad as we were led to believe from information I received."

Ellsworth said his father, "does care about his horses and

he was doing all he could to remedy the situation just as fast as he could, we all were."

"We just got behind and that's what happened. Hopefully, if we can have a little break and this kind of thing blows over, we can continue to get the horses moved around and taken care of or sold."

Impressive Mustangs host tough SBCC volleyballers

Sporting an impressive 2-0 league record the Mustang volleyball squad will host the Vaqueros of Santa Barbara City College tonight in an 8 p.m. non-league encounter.

The Mustangs handily disposed of Cal State Dominguez Hills Friday, winning in straight sets, 15-6, 15-6, and 15-5. They had beaten Cal Poly Pomona in their league opener in a tough five set match.

Coach Ken Preston feels his team is making good progress and should be a contender for the league title.

Said Preston, after his teams win Friday, "We have worked very hard and as a result we are passing, setting and playing super defense."

According to Preston SBCC has one of the better volleyball teams in California with "super players and good coaching." He thinks it will be a dandy match.

Fornication forbidden

NEWARK, N.J. UPI — Four moviemakers charged with fornication in the pornographic film "Deep Sleep" asked the federal courts Wednesday to abolish a New Jersey law prohibiting the act. The four asked a three-judge federal panel to declare the 1796 anti-fornication law unconstitutional in the context of film-making, arguing that the First Amendment guarantees the right to free expression through films.

Coed hoop tourney set

A two-on-two coed basketball tournament will be held Sunday in the Men's Gym at 1 p.m.

Each team must consist of one woman and one man. The men may not be varsity or junior varsity basketball players,

Basketball intramurals for women

The Women's Recreation Association will hold a women's intramural basketball league every Monday night, beginning Feb. 3. The league will meet in Crandall Gym at 9 p.m. and will be free of charge.

All women students are eligible to play in the intramurals league and will receive one-half unit credit for participating. Entry forms are available in either the housing office in Tenaya Hall or Crandall Gym. The deadline for the forms is Jan. 31.

however, the women may play for women's teams.

Trophies will be given to the winners, with finals being held at halftime of the Harlem Clowns game Feb. 19. Signups are in the Intramurals Office and the deadline is Saturday.
